WATCH: Time-lapse video shows 11-year construction of One World Trade Center

41 Action News Staff 9:28 AM, Jun 2, 2015

Don't be surprised if you get goosebumps watching this.

EarthCam recently uploaded a [video](#) to YouTube showing the rise of One World Trade Center. The video shows construction from October 2004 to late May 2015.

The video appeared a day before the One World Trade Center Observatory opened to the public on Friday, May 29.

Watch as the construction of the skyscraper rises from the base and continues floor-by-floor until it towers over lower Manhattan:
