

Timelapse of Levi's Stadium construction

Posted on September 17, 2014 at 4:58 pm by Mike Lerseth

It actually took a couple years to build, but thanks to the folks at [EarthCam](#) the construction of Levi's Stadium can be seen here in roughly 2 minutes time.

According to a news release from the company, more than 200,000 HD images were collected over 29 months by three megapixel construction cameras and one live streaming HD webcam.
