

A 90-second look at how SunTrust Park was built

Tim Tucker | May 2, 2017

From the early stages of construction until opening night, a time-lapse video has been created documenting the building of SunTrust Park.

More than two years of construction of the new Braves stadium is boiled down to just 90 seconds, using [EarthCam's](#) live streaming video and "billion pixel panorama time-lapse webcam."

Take a look, from foundation to completion, February 2015 to April 2017, courtesy of [EarthCam](#).

The Braves began their second homestand at SunTrust Park on Monday night, losing 7-5 to the New York Mets. The seven-game stand continues with three more games against the Mets and a weekend series against the St. Louis Cardinals.
