### Video & Cool Stuff

#### EarthCam's Software All-In-One Jobsite Documentation Package

EarthCam's Control Center 8 SaaS suite delivers progressive live streaming video, megapixel time-lapse archives and cinematic panoramas. This all-in-one jobsite documentation package has unique features designed to manage and control multiple construction camera networks simultaneously, including the latest 4K streaming video systems. An innovative feature is the ability to access date-stamped progress bookmarks and a selection of royalty-free music. Timelapse can be uploaded to YouTube, complete with a company-branded logo overlay and photos can be posted to Facebook, Twitter and Instagram.
