

Watch Hollywild bears live online with new webcam

WELLFORD, SC (FOX Carolina) Apr 11, 2013

People across the globe may not be able to travel to Hollywild Animal Park, so a new partnership with a popular webcam service will bring the adorable bears to computers everywhere.

On Thursday, Hollywild announced their new <u>Bear Cam</u> provided by <u>EarthCam</u>.

The EarthCam offers a live look at the park's different bears including Honey Bear the Grizzly Bear and adult Syrian Brown Bears Giza and Ramses as they rotate in and out of their shared exhibit. Viewers will also catch a glimpse of the Syrian Brown Bear triplet cubs - Amalia, Malica and Samra - who were born in January 2012.

The webcam can be moved throughout the park to feature different exhibits. To watch the webcam, a website was created "Eyes on Hollywild."

This is not the first EarthCam to make a splash in the Upstate. In October when the Greenville Zoo's giraffe was expecting, millions tuned in to watch the birth live online and keep up with newborn Kiko.

Hollywild Animal Park is located in Wellford and offers visitors an up close looks at a variety of wildlife.
