

San Francisco-Oakland Bay Bridge Construction Time-Lapse Video

by Elizabeth Seward (RSS feed) on Sep 4th 2013 at 2:30PM

[EarthCam](#) put together this video documenting the construction of the San Francisco-Oakland Bay Bridge via time-lapse – and it's amazing! The video captures over 42,000 hours of the construction work that took place over this four mile span in San Francisco. EarthCam's videos were on site gathering footage of the project since 2008. Enjoy.
