

## Is This Terrifying Storm About to Eat Manhattan?

Mario Aguilar - 10/07/13 3:42pm

All day we've been hearing about some terrible storms, and wind, and tornados that are coming for us New Yorkers. But thanks to the folks at [EarthCam](#), we can watch the this horrifying weather come straight at us live from a [webcam](#) mounted on the Statue of Liberty. It's getting dark over our office. Oh my god is the world about to end?

Maybe this terrible gloomy darkness won't bring the end of the world to Gawker Media, and the rest of the people huddled in offices and apartments in Manhattan, but wow, it's creepy to watch a storm like this come straight for the island. We'll have to wait and see what happens. Here's the forecast from [Weather.com](#):

The screenshot shows the EarthCam website interface. At the top, the EarthCam logo is visible on the left, and a search bar with a 'GO LIVE' button is on the right. The main heading is 'Statue of Liberty Cams'. Below this, there's a navigation menu with 'Home', 'TorchCam', 'CrownCam', 'Live Streaming view from the Torch', and 'Interactive Panoramas'. A paragraph of text follows, mentioning the return of the Statue of Liberty cameras and providing a link for more information. Below the text is a large live video feed showing a panoramic view of the New York City skyline from the Statue of Liberty. The video feed includes a timestamp 'October 06, 2013 | 3:50pm' and a weather widget on the right showing '66°' and 'a few clouds'. At the bottom, there are sections for 'Views from the Torch' (with thumbnails for TorchCam, BarberCam, CrownCam, Ellis Island, and Panorama) and 'Views of Lady Liberty' (with thumbnails for LibertyCam and Streaming). A small map of New York City is also present, with a red dot indicating the location of the cameras.
