

## Warhol's live broadcast of the grave

August 6, 2013

Pop Art pioneer Andy Warhol's last 85th birthday. Warhol died in 1987, not yet 58 years old, is an interesting event to celebrate the birthday signed Andy Warhol Museum.

EarthCam webcam images from around the world in collaboration with the museum that hosts the web site, since the previous night, live video broadcasting Warhol's grave in Pittsburgh. Tombstone 'figment' (imaginary) as of yesterday, the tomb of Warhol's wish not to write any expression except for flowers, balloons attention.
