EarthCam footage shows incredible decade-long clean-up and construction process as America completes re-build 13 years on from terrorist attacks

This incredible time-lapse video taken over eleven years shows the breathtaking One World Trade Centre skyscraper rising from the ashes of New York's Twin Towers.

The poignant official footage was captured by EarthCam throughout the decade-long clean-up and construction process of the new stand-out figure on the famous city skyline.

The official film has been released now the huge building project has been completed more than 13 years on from the terrorist attacks that shook America and the world.

EarthCam said: "Hundreds of thousands of high definition images were captured over the past 11 years and hand-edited for this exclusive time-lapse movie."

Each of the images has been donated to the National September 11 Memorial Museum by the organisation.

A total of 2,996 died in the four attacks in 2001 when four planes were hi-jacked by al-Qaeda terrorists and crashed into the World Trade Centre's iconic Twin Towers and the Pentagon.

A fourth plane crashed into a field in Pennsylvania after passengers tried to overpower the terrorists.
