To commemorate the 12th anniversary of the 9/11 attacks, EarthCam released new [time-lapse video](#) showing the progress of the One World Trade Center construction.

The video highlights the progress from October 2004 to September 2013.

One World Trade Center is the tallest building in the western hemisphere and the third tallest in the world. The spire installation comes in at 1,776 feet.

The time-lapse movie shows the transformation of lower Manhattan since the attacks of Sept. 11, 2001.
