

New Webcam Shows Upstate Bears, Cubs As They Roam And Play

SPARTANBURG COUNTY, S.C.
(WBTV News 13) Apr 11, 2013

A new feature at Hollywild Animal Park in Spartanburg County allows you to check out the bears on exhibit there around the clock.

The park has partnered with EarthCam to provide the new webcam. [EarthCam](#) is the same organization that brought you the giraffe cam in Greenville.

The latest camera in the Upstate lets you stream the display that houses Honey Bear, a grizzly, and Syrian Brown Bears Giza, Ramses and the three triplet cubs that were born in January of last year as they rotate in and out of their shared habitat.

The triplets have not yet been joined by their new sister, Syriana Nyeff who was born three months ago. Zoo officials say she is still too young to come out and play with the rambunctious siblings.
