

EarthCam CEO and Founder Brian Cury to Host Webcam Technology Discussion at Turner Innovation Series in the Middle East

EarthCam CEO and Founder, Brian Cury, will bring his 17 years of knowledge and construction industry expertise to the Middle East for a special series of educational presentations.

New York (PRWEB) October 21, 2013

EarthCam CEO and Founder, Brian Cury, will bring his 17 years of knowledge and construction industry expertise to the Middle East for a special series of educational presentations. EarthCam, the leader in providing construction camera technology and services, is a key sponsor of the event and will be showcasing its innovative webcam solutions for the MENA region.

The world's leading construction companies and developers will converge in the Middle East for the Turner Innovation Series conferences: October 27 in Abu Dhabi, October 29 in Doha and October 31 in Dubai. Cury will host a presentation at each venue about the benefits of using construction camera technology to monitor and document the region's most important projects. Attendees will learn how construction cameras aid in documenting progress for compliance & claims mitigation and archiving imagery for a complete historical record. Attendees will also learn how EarthCam's clients in the Middle East are leveraging their unique webcam content to promote their company and projects with impressive time-lapse movies.

"Turner is very excited to have one of its technology partners participating in this conference on innovations in the construction industry," said Nick Billotti, Chairman of Turner International. "EarthCam is a hallmark in our industry and we're pleased to have Brian Cury share his expert knowledge of construction camera technology with industry leaders in the Middle East."

EarthCam has been documenting and promoting the most significant projects in the Middle East since 2000 for clients including Al Muhaidib Contracting Co, Turner Construction, Six Construct, Aabar Properties and Tourism Development & Investment Company (TDIC). As experts in the MENA region, EarthCam has designed systems to work reliably in the most demanding environments. Clients in the region can rely on EarthCam's local support teams for installation, management and maintenance of their webcam networks.

Focusing on Building Information Modeling (BIM), Lean Construction techniques and advanced project management, the Turner Innovation Series provides the opportunity for industry professionals to network with their peers and learn more about innovative approaches for increasing the efficiency of any construction process.
