

## Webcam captures Lincoln community centre build

Jul 19, 2013

By Grimsby Lincoln News

Residents can have a front row seat to the construction of the town's new community centre — from the comfort of their own home.

A webcam has been installed at the project site and takes six-megapixel photographs of the construction every 15 minutes. Photos from the webcam allow the viewer to pan the construction site and can be combined to compose a time-lapse photo journal of the project.

To view the webcam, visit <http://earthcam.net/projects/townoflincoln>.
