

Commemorative 9/11 Time-Lapse Movie Shows Transformation of Memorial Site

Reflect on development at Ground Zero with Earthcam.

Posted by Lauren Padgett (Editor) , September 11, 2013 at 09:01 AM

To honor the events of September 11, [Earthcam](#) has shared a commemorative time-lapse of Ground Zero in New York City. This special movie highlights progress at the site, including the rise of One World Trade Center, from October 2004 to September 2013. You can watch the time-lapse at www.youtube.com/earthcam.

The panorama photo attached to this article was captured and auto-generated by the GigapixelCam at the site.

EarthCam has been providing reliable webcam documentation of the rescue, recovery and rebirth of the World Trade Center site since 2001. The company has dedicated itself to engineer, install, maintain and provide these images and time-lapse movies to the National September 11 Memorial & Museum for generations to come to remember and honor those we lost.
