Stunning video capturing the construction of the new One World Trade Center building in New York City has been released.

The [timelapse video](#) shows the construction of the building, commonly known as the Freedom Tower, from October 2004 to May 2015.

Hundreds of thousands of high definition images were captured over the past 11 years and hand-edited to make the video.

The video was released in recognition of last week's opening of One World Observatory, the viewing area at the top of the tower.

One World Trade Center and its companion building Two World Trade Center were both destroyed in terrorist attacks on 11 September 2001.
