

Visit the World with EarthCam

October 25, 2016

If you would like to explore different locations in the world, here is a cool tool that will help you do that.

EarthCam provides a virtual window to the world, and you can freely explore the globe from different points such as Times Square, Statue of Liberty, Japan, Toronto or Bangkok. You can also visit animal and zoo cams around the world 24/7 live.

EarthCam is a cool tool to explore and talk about different places in the world or compare two places. The students can describe what they see and they can make assumptions about the culture of that place. Or that place can be the main place of their story and the students can narrate their story.

Enjoy!
